WHEEL EXCAVATOR

Model Code : ZX170W-5B

Engine Rated Power : 122 kW

Operating Weight : 17 400 - 19 500 kg

Backhoe Bucket ISO Heaped : 0.52 - 0.82 m³

WALK AROUND

CONTENTS

4-5 Versatility

A wide range of tasks can be completed by Hitachi wheeled excavators.

6-7 Productivity

Hitachi wheeled excavators have a high impact on efficiency but a low impact on the environment.

8-9 Comfort

The cab of the new Hitachi wheeled excavators provides a safer and comfortable work space.

10-11 Durability

Hitachi is renowned for manufacturing high-quality machines that can meet the demands of the toughest job sites.

12-13 Maintenance

Easily accessible features for cleaning and routine maintenance maximise the availability of the ZAXIS 170W.

14-15 Hitachi Support Chain

A wide range of after-sales services and support options is available to all our customers.

16-22 Specifications

Enhanced visibility

Visibility of the front of the machine, especially on the right-hand side, has been improved for safer operation.

Added durability

The reinforced chassis and strengthened brackets on the boom foot are capable of withstanding rugged environments.

Higher productivity

The HIOS III hydraulic system achieves higher productivity with better fuel consumption than the conventional ZAXIS model, which helps to reduce costs.

Faster movement

The arm recirculation cancel and hydraulic boosting systems increase the arm speed during operation.

New power boost

The newly provided power boost helps to increase digging power and lifting power.

ZAXIS Empower your Vision.

The design of the new Hitachi ZAXIS 170W medium excavator is inspired by one aim – empower your vision. It delivers on five key levels: performance, productivity, comfort, durability and reliability. We recognise that fleet owners require high-quality, efficient machines that can work effectively, even in challenging conditions. We also realise that operators need a safer, user-friendly work space, and a machine that can respond to their skills with speed and precision. And to achieve a satisfying result, on time, on budget and to a high standard, we have aimed to maximise availability of the new ZAXIS 170W with easy maintenance features and the Hitachi Support Chain after-sales programme.

Expanded leg room

The cab of the new ZAXIS is more spacious for the operator, with 45 mm more leg room, wider access with a flip-up side console.

Ultimate comfort

The heated suspension seat is ideal in cold climates and absorbs vibration during operation minimising operator fatigue.

Easily accessible information

The large multi-function LCD monitor screen is easy to view in bright sunlight or darkness and provides technical data.

Quick and easy service access

Inspection parts are conveniently located.

NOTE : The photo in this brochure show excavators with optional equipment.

VERSATILITY

Suitable for use on any construction project, the new ZAXIS 170W can be equipped with several different kinds of attachments to complete a variety of tasks. Designed to offer enhanced power and speed, and reduced running costs, it will easily outperform other models in its class. Like all new Hitachi wheeled excavators, it is also easy to operate, so that you can manoeuvre it quickly and effortlessly around the job site.

Versatile, powerful and easy to operate

Lower fuel costs

Winning tenders and meeting production targets are highly competitive processes for you to develop your business. The choice of construction machinery is of paramount importance and your success relies on the productivity and efficiency of your equipment. This is where our new HIOS III hydraulic system comes into its own.

The latest advanced hydraulic and electronic technologies are central to our goal of delivering a significant saving on fuel costs with the new low-emission engine. We are delighted that HIOS III hydraulics allow you to achieve 5% less fuel consumption in PWR mode – than the previous ZAXIS P-mode – while maintaining a high level of productivity at the same time*.

Furthermore, a reduction of 14% in fuel consumption is also possible in ECO mode*. This still delivers a relatively high level of productivity using the same amount of fuel.

Versatile performance

Powerful, fast and easy to use, the new ZAXIS wheeled excavators are capable of impressive performance levels and are extremely versatile for a variety of applications.

The lifting capacity has been increased by 7%, extending the machine's capability for moving heavy loads. This is further enhanced by the auto power boost function, when greater force is required. Similarly, a new power boost function increases the digging force by 6% for up to eight seconds, when needed.

The front speed of the new models has been enhanced by the HIOS III boom recirculation system – pressurised oil is circulated in the boom cylinder when lowering the boom, allowing pressurised oil from the pump to be used efficiently to increase the speed of the arm.

These are easily fitted using the attachment support system, with 11 modes that can be registered on the monitor. A new pressure adjustment feature offers protection of individual attachments by setting the required pressure.

** Based upon typical work pattern collected via Global e-Service*

Key features

■ 5% reduction in fuel consumption
(PWR mode vs previous P-mode)

■ 14% reduction in fuel consumption
(ECO mode vs previous P-mode)

■ New HIOS III hydraulic system
higher productivity and less fuel consumption

■ Attachment support system

■ Power-boost

■ Increased lifting capacity

PRODUCTIVITY

Equipped with a powerful new engine and advanced hydraulics, the ZAXIS 170W is capable of achieving higher efficiency levels on the job site than previous models. It promises to bring you a quick return on your investment and contribute to greater profitability for your business. Hitachi design engineers have ensured that it meets the latest EU regulations on emission standards and have given it a variety of sustainable features intended to reduce its impact on the environment.

Greater efficiency and a smaller environmental impact

Sustainable efficiency

Minimising the environmental impact of our construction equipment was an important consideration during the design of the new ZAXIS wheeled excavators. We are committed to developing machines that are both sustainable and productive in order to meet the needs of our customers, as well as satisfy the requirements of the EU regulations on emission controls.

The ZAXIS 170W is equipped with a muffler filter that captures and burns air pollutants, with an oxidation catalyst and exhaust temperature control. Levels of nitrous oxide are also reduced by the excavator's variable geometry turbocharger, which encourages optimum combustion.

Another feature designed to reduce emissions is the Auto Shut-down, which also helps to prevent fuel wastage and lowers the noise level in the cab. Combining this with the Auto-Idle function can also prevent further fuel wastage.

Powerful efficiency

Despite the reduced environmental impact of the new ZAXIS wheeled excavators, they are guaranteed to have a maximum efficiency impact at any job site. We have strived to balance our obligations to comply with the latest environmental regulations with your needs for high productivity and profitability.

Hitachi wheeled excavators are renowned for their reliability and high productivity, which is vital for meeting deadlines on busy job sites. The latest range of ZAXIS models builds upon this reputation, offering increased efficiency and sustainable operations.

** Based upon typical work pattern collected via Global e-Service*

Key features

- | | |
|---|---|
| ■ Powerful and sustainable | ■ HIOS III hydraulic system – fuel efficiency and higher productivity |
| ■ Stage IIIB-compliant engine | ■ Environmentally friendly design |
| ■ Muffler filter that captures particulate matter | ■ Auto shut-down – fuel saving for carbon dioxide reduction |
| ■ Variable geometry turbocharger – optimal combustion | |
| ■ High volume-cooled EGR system | |

COMFORT

The latest range of ZAXIS wheeled excavators has been designed to satisfy the demands of our customers and operators around the world. The cab is more spacious than previous models, and also offers excellent visibility and a variety of user-friendly features to give an unrivalled level of comfort. Thanks to the attention to detail of Hitachi design engineers, you can enjoy spending time in the ZAXIS 170W, and get the job done safely and with ease.

A superior level of operator comfort

Comfort guaranteed

Long shifts on construction sites used to take their toll on operators, but the comfortable cab of the new ZAXIS wheeled excavators has been designed to ensure that once you leave work, you feel ready to enjoy the rest of your day. The ZAXIS 170W now offers a more spacious working environment – with a fully adjustable suspension seat that slides further back than previous models and extended leg room by 45 mm.

Enhanced visibility

The new ZAXIS 170W incorporates several developments from Hitachi that will help to enhance visibility from the operator's seat, which is essential for working safely on busy construction sites. The right side of the machine has been redesigned, including a reshaped front cover, to allow for better visibility from the cab. The new model also has a redesigned monitor that fits neatly in line with the right-hand pillar, again to enhance visibility through the front window.

A new rear-view camera provides a broader range of visibility, so you can see immediately below the counterweight. The new monitor shows both operation status icons and the rear view simultaneously, so there is no need to switch displays.

User-friendly functionality

Hitachi has invested heavily in the advanced technology inherent within the new ZAXIS. The power remains firmly at your fingertips thanks to the functionality of the colour monitor and ergonomic controls.

The new multi-function LCD monitor has a large seven-inch screen that is easy to view. It provides a wide range of useful technical information, including a clear indication of the machine's status and settings with multi-lingual support in up to 32 languages. The monitor and ergonomically designed switches have been grouped together within easy reach of your right hand. The proportional switches in the new, auxiliary function lever allow easy control of the front attachment. An auxiliary terminal has also been added to the sound system, so that you can work efficiently and smoothly to your favourite music via devices such as MP3 players and the inclusion of storage for an MP3 player.

Key features

■ High-spec ROPS cab

■ Enhanced visibility

■ New colour LCD monitor

■ Easily accessible real-time information

■ Expansive leg room

■ Ergonomically designed control panel

■ Auxiliary terminal and storage for an MP3 player

DURABILITY

Hitachi construction machinery is renowned for its high quality, reliability and durability by customers around the world. The new range of ZAXIS wheeled excavators has been developed using decades of manufacturing experience and with an advanced technological approach. That's why they are able to operate in some of the toughest environments and can be relied upon to deliver high levels of availability, no matter where they are working.

Designed to work in challenging environments

Durable parts

The new ZAXIS 170W has been designed to operate in the most challenging of working conditions. Tough job sites require reliable machines, which deliver increased levels of availability and productivity. The bottom line is that you will enjoy a lower cost of ownership thanks to the durability of our wheeled excavators.

The strengthened front attachment on the new ZAXIS 170W is a good example. The brackets on the boom foot and end have been equipped with a bushing to enhance its durable characteristics and withstand the rigours of long hours in rugged environments.

A filter-type high-performance water separator is provided standard. It captures moisture in fuel, even from fuel that contains a large amount of moisture.

Additional reinforcements

The chassis of the new ZAXIS wheeled excavators has been reinforced for added durability. The cover to protect the blade cylinder is larger and further protection is provided by a structure that conforms to the top and bottom of the blade.

The transmission unit is installed above the axle to prevent it hitting unexpected obstacles. It also features a reinforced outrigger cover.

Key features

- Proven Hitachi quality
- More than 40 years of expertise
- Strengthened front attachment
- Reinforced undercarriage

MAINTENANCE

The new Hitachi ZAXIS 170W has been built with several easily accessible features for routine cleaning and maintenance. They will allow you to carry out daily inspections and servicing quickly and conveniently, so that you can continue with the task at hand. Maintaining consistently high levels of productivity and availability has a big impact on your business, so Hitachi engineers have created a range of wheeled excavators that you can rely on to keep working for longer.

Quick and convenient solutions to optimise availability

Easy access

A range of convenient features integrated within the new ZAXIS medium excavators are designed to make life easier. Our engineers have assessed your requirements and integrated a number of time-saving factors for routine maintenance.

Using the technology within the multi-function LCD monitor you can check engine oil volumes and see the warning light that appears when the hydraulic oil and fuel filters are due for replacement. In addition, you can set the routine service schedule to help prevent breakdowns each time the ignition switch is turned on.

The fresh air filter for the air conditioner is located to the side of the cab door from behind the operator's seat. This allows for easy cleaning and replacement of the filter. An electric fuel-refilling unit with fuel filter is also provided as standard.

From ground level, you can access the double fuel filter, engine oil filter and water separator via wide doors. Hydraulic oil can be used for up to 5,000 hours.

Minimal downtime

In order to ensure the smooth running of your machine and to minimise downtime, regular maintenance is essential. Fortunately it's easy and simple to carry out such tasks on the new ZAXIS wheeled excavators, so you can focus on getting the work done.

For example, the engine oil pan is fitted with a drain coupler, so when draining, an associated drain hose is connected to the drain coupler. The reliable drain coupler helps to prevent oil leakages and vandalism, which could both cause unnecessary downtime to any project.

Key features

- Global e-Service monitors muffler filter
- Daily checks from ground level
- Oil volumes checked from the operator's seat
- Quick and easy service access

SUPPORT CHAIN

As soon as you become a Hitachi customer, you can rely on first-class after-sales service from your authorised dealer. Hitachi provides extensive support to each of the dealers within the Australian network, so that they can ensure your ZAXIS 170W continues to meet your requirements and exceed expectations. To further protect your investment in Hitachi construction machinery, we have introduced the Hitachi Support Chain after-sales programme. This gives you the flexibility to create a tailor-made service plan from the following key-areas, “links” in the chain of service available from Hitachi via your local dealer.

A flexible after-sales programme created to protect your investment

Global e-Service

The new ZAXIS excavator is equipped with a GPRS communication system*. This sends a wide range of machine data to the Hitachi main server. Via the Global e-Service database, you will have remote access to all of this data. All you need is an internet connection and your Global e-Service log-in details.

Global e-Service enables you and your dealer to download and share this data, helping you to remotely manage your fleet. The online facility also helps your dealer to proactively advise you on preventive maintenance and related special offers.

The latest information on the ZAXIS excavator is available 24/7 and includes operational data, such as the number of working hours, fuel consumption figures, working modes and location. This helps you to reduce running costs, plan jobs efficiently and keep up to date with machine maintenance – to ensure optimum performance and minimal downtime.

Technical support

The professional and highly trained Hitachi service team combines the global expertise and knowledge of Hitachi Construction Machinery with your local language and culture. We take a proactive approach towards customer service by continuously training our dealer personnel, so that the available global knowledge is passed on to each individual technician in our dealer network.

Extended warranty and service contracts

Every new Hitachi model is covered by a full manufacturer's warranty. However, your ZAXIS excavator may require extra protection due to severe working conditions or to reduce equipment repair costs. To meet these demands, our dealers offer the option of a unique extended warranty programme (HELP – Hitachi Extended Life Program) and comprehensive service contracts – the most effective way to optimise the performance of your new ZAXIS excavator.

Parts and remanufactured components

Hitachi offers different lines of parts and components to suit your specific needs. In addition to our range of genuine parts, there are other options available:

- If your machines have been working for several years, Hitachi can offer a second line of genuine parts as an attractively priced solution.
- For that highly demanding application or climate, Hitachi provides a line of parts with extra performance.
- When you are looking for an economical solution for preventive replacements, remanufactured components are the best option.

Whatever choice you make, you can be assured of the renowned Hitachi quality and warranty to give you added peace of mind.

Your Hitachi dealer can supply you with more details on each of the above parts lines.

* The GPRS communication system is standard equipment for new ZAXIS excavators, however, the availability of the communication system depends on licensing regulations in your country. Please contact your Hitachi dealer for more information or to apply for a Global e-Service account.

SPECIFICATIONS

ENGINE

Model	Isuzu AM-4HK1X
Type	4-cycle water-cooled, common rail direct injection
Aspiration	Variable geometry turbocharged, intercooled, cooled EGR
After treatment	Muffler filter
No. of cylinders	4
Rated power	
ISO 14396	128 kW at 2 000 min ⁻¹
ISO 9249, net	122 kW at 2 000 min ⁻¹
EEC 80/1269, net	122 kW at 2 000 min ⁻¹
SAE J1349, net	122 kW at 2 000 min ⁻¹
Maximum torque	655 Nm at 1 500 min ⁻¹
Piston displacement	5.193 L
Bore and stroke	115 mm x 125 mm
Batteries	2 x 12 V / 93 Ah

HYDRAULIC SYSTEM

Hydraulic Pumps

Main pumps	2 variable displacement axial piston pumps
Maximum oil flow	2 x 157 L/min
Pilot pump	1 gear pump
Maximum oil flow	30 L/min
Steering pump	1 gear pump
Maximum oil flow	28.6 L / min

Hydraulic Motors

Travel	1 variable displacement axial piston motors
Swing	1 axial piston motor

Relief Valve Settings

Implement circuit	34.3 MPa
Swing circuit	33.4 MPa
Travel circuit	34.8 MPa
Pilot circuit	3.90 MPa
Power boost	36.3 MPa

Hydraulic Cylinders

	Quantity	Bore	Rod diameter
Boom	2	110 mm	80 mm
Arm	1	120 mm	90 mm
Bucket	1	105 mm	75 mm
Positioning †	1	170 mm	105 mm

† For 2-piece boom

UPPERSTRUCTURE

Revolving Frame

D-section frame for resistance to deformation.

Swing Device

Axial piston motor with planetary reduction gear is bathed in oil. Swing circle is single-row. Swing parking brake is spring-set/hydraulic-released disc type.

Swing speed	12.2 min ⁻¹
Swing torque	42.8 kNm

Operator's Cab

Independent spacious cab, 1 005 mm wide by 1 675 mm high, conforming to ISO* Standards.

* International Organization for Standardization

UNDERCARRIAGE

Wheeled type undercarriage. The frame is of welded, stress-relieved structure.

Drive system: 2 speed power shift transmission and variable displacement axial piston type travel motor.

Travel speed (forward and reverse)

Creeper speed range	0 to 2.4 km / h
Low speed range	0 to 8.6 km / h
High speed range	0 to 35 km / h

Maximum traction force	102 kN
Gradeability	70% (35 degree)
Min. turning radius	6 650 mm

Axle:

All-wheel drive.

The front axle can be locked hydraulically in any position.

Oscillating front axle..... ± 7°

Brakes system:

Maintenance free wet-disc brakes on axle are standard.

Fully hydraulic service brake system

SOUND LEVEL

Sound level in cab according to ISO 6396 LpA 71 dB(A)

External sound level according to ISO 6395 and

EU Directive 2000/14/EC LwA 100 dB(A)

SERVICE REFILL CAPACITIES

Fuel tank	290 L
Engine coolant	25.0 L
Engine oil	23.0 L
Swing device	6.20 L
Transmission	2.50 L
Front differential gear	9.50 L
Rear differential gear	14.0 L
Hub reduction gear	
Front axle	2 x 2.50 L
Rear axle	2 x 2.50 L
Hydraulic system	180 L
Hydraulic tank	100 L

LIFTING CAPACITIES

- Notes:
1. Ratings are based on ISO 10567.
 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 4. *Indicates load limited by hydraulic capacity.
 5. Each value with Rear blade up over the Front-axle side and each value with Rear blade down over the Rear-axle side respectively, and value in optimal position with positioning cylinder.
 6. 0 m = Ground.

A: Load radius
B: Load point height
C: Lifting capacity

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities without bucket.

ZAXIS 170W 2-PIECE BOOM, 2.50 M ARM, STANDARD GAUGE, 4 000 KG COUNTERWEIGHT

Rating over front or rear Rating over-side 360 degrees Unit: 1 000 kg

Stabilization		Load radius										At max. reach		
		1.5 m		3.0 m		4.5 m		6.0 m		7.5 m		At max. reach

EQUIPMENT

● : Standard equipment

○ : Optional equipment

ENGINE

Alternator 50 A	●
Air cleaner double filters	●
Auto idle system	●
Auto shut-down control	●
Cartridge-type engine oil filter	●
Dry-type air filter with evacuator valve (with air filter restriction indicator)	●
Dust-proof indoor net	●
ECO/PWR mode control	●
Electrical fuel feed pump	●
Engine oil drain coupler	●
Engine warm-up device	●
Fan guard	●
Fuel cooler	●
Fuel main filter	●
Fuel pre-filter	●
High performance water separator	●
Isolation-mounted engine	●
Muffler filter	●
Maintenance free pre-cleaner	○
Radiator reserve tank	●
Radiator, oil cooler and intercooler	●

HYDRAULIC SYSTEM

Auto power lift	●
Control valve with main relief valve	●
Extra port for control valve	●
Full-flow filter	●
High mesh full flow filter with restriction indicator	○
Hose rupture valve for arm	●
Hose rupture valve for boom	●
Pilot filter	●
Power boost	●
Shockless valve in pilot circuit	●
Steering filter	●
Suction filter	●
Swing dampener valve	●
Variable relief valve for breaker & crusher	●
Work mode selector	●

CAB

All-weather sound suppressed steel cab	●
AM-FM radio	●
Ashtray	●
Auto control air conditioner	●
Auxiliary function lever	●
AUX. terminal and storage	●
Cigarette lighter 24 V	●
CRES V (center pillar reinforced structure) cab	●
Drink holder with hot & cool function	●
Electric double horn	●
Engine shut-off switch	●
Equipped with reinforced, tinted (green colour) glass windows	●
Evacuation hammer	●
Floor mat	●
Footrest	●
Front guard (lower mesh type)	○
Front window washer	●
Hot & cool box	●
Intermittent windshield wipers	●
Key cylinder light	●
Laminated round glass window	○
LED room light with door courtesy	●
OPG top guard Level II (ISO10262) compliant cab	○
Pilot control shut-off lever	●
Power outlet 12 V	○
Rain guard	●
Rear tray	●
Retractable seat belt	●
ROPS (ISO12117-2) compliant cab	●
Rubber radio antenna	●
Seat : air suspension seat with heater	●
Seat adjustment part : backrest, armrest, height and angle, slide forward / back	●
Short wrist control levers	●
Sun visor (front window)	●
Transparent roof with slide curtain	●
Windows on front, upper, lower and left side can be opened	●
2 speakers	●
4 fluid-filled elastic mounts	●

MONITOR SYSTEM

Alarm buzzers: overheat, engine oil pressure, overload	●
Alarms: overheat, engine warning, engine oil pressure, alternator, minimum fuel level, hydraulic filter restriction, air filter restriction, work mode, overload, etc	●
Attachment operational information	●
Display of meters: Speedometer, Tachometer, Trip meter, water temperature, hour, fuel rate, clock	●
Other displays: work mode, auto-idle, glow, rearview monitor, operating conditions, etc	●
32 languages selection	●

LIGHTS

Additional boom light	○
Additional cab roof front lights	○
Additional cab roof rear lights	○
Brake lamps	●
Clearance lamps	●
Hazard lamps	●
Licence lamp	○
Rotating lamp	○
Turn signal lamps	●
Working lights	●
2 head lights	●

UPPER STRUCTURE

Electric fuel refilling pump with auto stop and filter	○
Fuel level float	●
Hydraulic oil level gauge	●
Rear view camera	●
Rear view mirror (right & left side)	●
Side view camera	○
Swing parking brake	●
Undercover	●
93 Ah batteries	●
4 000 kg counterweight	●

UNDERCARRIAGE

Clamshell bracket	○
Front dozer blade + rear outrigger	○
Front outrigger + rear dozer blade	○
Front outrigger + rear outrigger	○
Parking brake	●
Rear dozer blade	○
Rear outrigger	○
Right toolbox	○
Tire spacer	●
Toolbox: left chassis	●
Traction types pattern tires (10.00-20 14 PR)	●
4 tie down hooks	●

FRONT ATTACHMENTS

Casted bucket link A	●
Centralized lubrication system	●
Dirt seal on all bucket pins	●
Flanged pin	●
HN bushing	●
Reinforced link B	●
Reinforced resin thrust plate	●
WC (tungsten-carbide) thermal spraying	●

ATTACHMENTS

Accessories for 2 speed selector	○
Additional piping	○
Additional pump (30 L/min)	○
Attachment basic piping	●
Breaker and crusher piping	●
HSB Parts for breaker and crusher	●
Pilot accumulator	●
PTO valve	○

MISCELLANEOUS

Battery disconnect switch	●
Global e-Service	●
Level indicator	●
Lockable fuel refilling cap	●
Lockable machine covers	●
Onboard information controller	●
Satellite communication system unit	●
Skid-resistant, plates and handrails	●
Standard tool kit	●
Theft prevention system*	○
Travel alarm	●
Travel direction mark on chassis frame	●

Standard and optional equipment may vary by country, so please consult your Hitachi dealer for details.

* Hitachi Construction Machinery cannot be held liable for theft, any system will just minimize the risk of theft.

[illegible]

Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Hitachi Environmental Vision 2025

The Hitachi Group (the Group) released the Environmental Vision 2025 to reduce their annual carbon dioxide emissions. While the Group is committed to global production, the focus is to reduce the environmental impact of all products, and fulfil a sustainable society by tackling three goals — prevention of global warming, recycling of resources, and enhancing the ecosystem.

Reducing Environmental Impact by the New ZAXIS

Hitachi reduces carbon emissions for global warming prevention according to LCA*. The new ZAXIS exemplify the Group's commitment to the environment through features, such as the new standard mode which optimises fuel efficiency. Hitachi has long been committed to the recycling of components, such as aluminium parts in radiators and oil coolers. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

Prior to operating this machine, including the satellite communication system, in a country other than the country of its intended use, it may be necessary to make modifications to the machine to ensure it complies with the local regulatory standards (including safety standards) and legal requirements of that particular country. Please do not export or operate this machine outside the country of its intended use until such compliance has been confirmed. Please contact your Hitachi dealer regarding compliance. These specifications are subject to change without notice.

Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, customer installed and modified parts, optional parts and all standard equipment with some differences in colour and features. Before use, read and understand the Operator's Manual for proper operation.
